

Enhanced PDF with Syntax Highlighting Demo

Professional Tutorial with Advanced Code Highlighting

Enhanced PDF with Syntax Highlighting

This demonstrates advanced syntax highlighting in PDF code blocks!

JavaScript Example

```
1 // This is a comment
2 const generateTutorial = async (content) => {
3   try {
4     const result = await processContent(content);
5     return {
6       success: true,
7       data: result,
8       timestamp: new Date().toISOString()
9     };
10  } catch (error) {
11    console.error("Processing failed:", error);
12    return { success: false, error: error.message };
13  }
14 };
15 // Usage example
16 const tutorial = await generateTutorial(markdownContent);
17 console.log(tutorial.success);
```

Python Example

```
1  # Python function with syntax highlighting
2  def process_tutorial(content):
3      try:
4          result = analyze_code(content)
5          return {
6              "success": True,
7              "data": result,
8              "timestamp": datetime.now().isoformat()
9          }
10     except Exception as e:
11         print(f"Error: {e}")
12         return {"success": False, "error": str(e)}
13 # Usage
14 tutorial = process_tutorial("sample content")
15 print(tutorial["success"])
```

Features

- 🔗 Syntax Highlighting: Keywords, strings, comments, numbers
- 🔗 Multiple Languages: JavaScript, Python, Java support
- 🔗 Enhanced Design: Gradient backgrounds, rounded corners
- 🔗 Line Numbers: Professional code presentation
- 🔗 Color Coding: Different colors for different syntax elements
